## Education

**University of Wisconsin Madison**

*Bachelor of Science in Computer Science*

**Sept. 2018 – Anticipated Dec 2021**

*Madison, WI*

## Experience

**Banks Lab, Department of Anesthesiology**

*Undergraduate Researcher*

**March 2020 – Present**

*Madison, WI*

- Created Markov models of functional magnetic resonance imaging (fMRI) and intracranial electrophysiological (iEEG) time series data
- Got functional clusterings, based off network flow, of iEEG Markov models using the InfoMap algorithm
- Used Diffusion Map Embedding, a non-linear dimensionality reduction technique, to calculate the similarity between fMRI and iEEG Markov models and how non-random sampling in iEEG data affects its description of the brain
- Engineered a pipeline that handles over 40 patients and 300 GBs of fMRI and iEEG data from preprocessing to a Dash webapp, which visualizes data in real time

**Capital One**

*Software Engineer Intern*

**June 2021 – August 2021**

*Remote*

- Worked in Card Tech-ML, optimizing the run time of a machine learning model, which generates over a billion dollars annually, that determines likelihood that a customer will pay back their credit card debt after 6 months of delinquency
- Utilized: AWS S3 Buckets, Docker, Snowflake, Spark, and Kubernetes

**AtomBeam Technologies**

*Software Engineer Intern*

**July 2019 – January 2020**

*Moraga, CA*

- Used Github, Python and the Boto3 SDK to develop scripts to automate the testing of the AtomBeam IP on AWS
- Reviewed core code written in C that is used to develop the AtomBeam IP
- Performed algorithmic analysis and review on mathematical white papers

## Publications and Presentations

**Paper Perwrite:** Matthew I. Banks, Bryan M. Krause, **D. Graham Berger**, Etc. "Functional geometry of auditory cortical resting state networks derived from intracranial electrophysiology"

**Conference Poster:** **D. Graham Berger**, Etc. "Comparison of functional geometry of cortical networks derived from functional magnetic resonance imaging (fMRI) versus intracranial electroencephalography (iEEG)", SFN 2021

**Conference Poster:** Matthew I. Banks, Bryan M. Krause, **D. Graham Berger**, Etc. "Functional geometry of cortical resting state networks derived from intracranial electrophysiology", SFN 2021

**Conference Poster:** Declan Campbell, Bryan M. Krause, **D. Graham Berger**, Etc. "Graph theoretic measures indexing arousal state transitions during sleep and anesthesia in human subjects", SFN 2021

## Projects

**Self Driving Remote Control Car**

**July 2020 - Present**

- Built a computer operated RC car with a Jeston Nano and Doneky Car software
- Used supervised learning, based on human driving, to auto driving
- Currently: Utilizing Unity to create a self-driving policy with reinforcement learning

**Lunar Lander Reinforcement Learning**

**June 2021**

- Used Actor-Critic reinforcement learning method to solve LunarLander-v2 environment in OpenAI gym

## Awards

**Hilldale Research Fellowship** | [My proposal](#)

**April 2021**

**IOHK: Plutus Pioneer Program Certification**

**July 2021**

**Eagle Scout Award**

**May 2016**
